FERRITE DISCS WITH LOGO

Our **Magnets with custom logo** are a crucial gadget for enhancing the marketing efforts of companies and associations, or simply for creating unique keepsakes and souvenirs.

The versatility of the magnetic support allows these products to be used on a wide variety of metal surfaces, maximizing the potential uses and visibility of the imprinted logo.

Neodymium magnets are particularly recommended for any situation where higher-than-normal magnetic force is required (to prevent them from easily detaching).
For this purpose, we also offer the **SM15.2280** Magnetic System as an even higher-strength alternative, designed for particularly heavy-duty use.

You can have your custom logo imprinted on magnets of various sizes - the table lists some of the most popular and versatile ones.

You can choose one of the following options for the final logo finish:

- **Transparent resin lens**, for a "dome effect" over the logo;
- **Self-weeding sticker**, which only leaves certain predetermined elements of the logo in relief, leaving the base of the magnet exposed;
- **Photographic printing** on a smooth plastic surface, for a "classic" look.

All measurements are in millimeters. Other sizes and shapes on request.

CODE	TYPE	DIAMETER	H	STRENGTH KG
ML04.FE0000.202	FERRITE	20	2	0,30
ML04.FE0000.303	FERRITE	30	3	0,60
