

MAGNETIC SYSTEM SM34 WITH SNAP-HOOK

The SM34 with snap-hook, which comes in kit form, is a ready-to-use solution for various applications: the integrated eyelet can be used directly with the hook (included in the product) or with other fastening systems.

This magnet uses the great force of magnetic NdFeB alloy, which is further enhanced by the **steel cup**, and can be used to lift various objects, securing them with ropes or chains.

This makes these magnets particularly popular in various **industrial sectors** and for **private use** or for **DIY projects**.

You can view and download the technical drawings of each product by clicking on the respective code, highlighted in [blue](#).

All measures are in millimeters (mm).

CODE	A	B	STRENGTH KG
SM34.35NI00.2507CM	25	7	28
SM34.35NI00.3207CM	32	7	49

The maximum standard operating temperature is 80 °C.

On request, we can supply magnets capable of operating at higher temperatures, as indicated in the [Materials Table](#).

Many of these sizes are also available in other variants, with different coatings and degrees of magnetization.

The force values given in the tables are the result of dynamometric tests performed with a 10 mm thick iron plate.

Any variations from this standard in the use may change the actual performance of the magnet.

It is always recommended to perform specific tests according to your application.
