

SEW-IN MAGNETS

MC01 magnets are comprised of a neodymium disc magnets encapsulated in a transparent, waterproof plastic pouch, with a large external surface that is both resistant but flexible, and can be sewn onto many cloths.

This product is supplied as a standard in two polarities, easily distinguishable by the different colors of each pole. In this way, the magnets attract each other on the correct side.

On request, it is possible to receive the entire supply of a single polarity.

Contact us to have quick feedback on prices and availability.

You can view and download the technical drawings of each product by clicking on the respective code, highlighted in .

All measures are in millimeters (mm).

CODE	TYPE	DIAMETER	H	STRENGTH KG
MC01.350000.102	SC35MANI	10	2	0,50
MC01.350000.122	SC35MANI	12	2	0,60
MC01.350000.202	SC35MANI	20	2	2
MC01.350000.203	SC35MANI	20	3	4,50

The force values given in the tables are the result of dynamometric tests performed with a 10 mm thick iron plate. Any variations from this standard in the use may change the actual performance of the magnet.

It is always recommended to perform specific tests according to your application.
